

CORPORATE RESPONSIBILITY

Our mission is to be the Nordic meat expert. This means producing, selling and marketing meat and meat products in a responsible and ethical way. This covers the entire value chain, starting from feed and the genetics of production animals all the way to the consumer's plate. Sustainable business creates value for all our stakeholders every day.

We are committed to systematically developing the sustainability of our business through our strategy, operations and actions. At HKScan, every employee is urged to contribute to responsible ways of working.
